Coleman Men Severely Burned In Car Accident

Gasoline Explodes, Enveloping Them in Flames; Both Are Now in Hospital.

Two Coleman youths were severely burned on Sunday evening at 9:30 on the main highway four miles east of Homer. Alex. Gillis and John McLaach, driving a Pontiac coupe, stalled on the roadside when the gasoline line of the car burst. After making some temporary repairs, they attempted to pour some gasoline into the vacuum tank in an effort to get the engine started. Being dark, Gillis lit a match, taking care to get that he thought a safe distance away and against a slight wind which was blowing. The wind suddenly changed, the gas fumes ignited, throwing flaming gas over both men.

Gillis' vest and shirt were burned from his back, his back and left forearm burned black. McLaach received severe arm and leg injuries, though not to the same extent as Gillis. Luckily two cars happened to pass at that time and costs were flung over the burning men. The car, partly on fire, was thrown off the road and the fire extinguished. The two agonized men were placed in a rumble seat and taken to the Michel hospital, where they were in a serious condition suffering from shock. They were brought to Coleman hospital on Monday, where they are at the present time. Gillis will be a patient for a number of weeks.

COLEMAN HOMING SOCIETY

The third young birds' race was flown from Didsbury, Alberta, August 13th.

With the weather bad at Didsbury, the birds were not liberated until 9:20 a.m. and were clocked in at Coleman as follows:

1st, F. Beddington, 1:46-24 p.m.

2nd, M. Tarcon, 1:47-05 p.m.

3rd, G. Rayman (shorty) 1:47-55 p.m.

Next race will be from Red Deer. Birds to be at C.P.R. depot by 12 noon, Friday, August 19th.

DEATH OF P. L. WAGNER

The death occurred at Columbus, Ohio, on Thursday, August 11, of Mr. Philip Wagner, husband of Mary Kilgannon, a former Coleman girl. Mr. Wagner had been in ill-health for a considerable time.

Mrs. Wagner had wired her mother, Mrs. Kilgannon, on Thursday morning of her husband's serious illness, and at noon the same day sent another wire telling of his death. Mrs. Kilgannon and daughter, Mrs. S. B. Ryan, left immediately to attend the funeral.

Besides his widow, a daughter is left to mourn his passing.

WEDDINGS

ALLEN-O'DONNELL

A wedding of wide interest took place on Monday morning, August 8, at ten o'clock, at the home of Dr. and Mrs. Kerby in Calgary when Janet Burgess Reid, elder daughter of Mr. and Mrs. Thomas O'Donnell, of Rose-dale, was united in marriage to Mr. Horace Allen, youngest son of Mr. Peter Allen, of Vancouver, and the late Mrs. Allen.

The ceremony was performed by the Rev. G. W. Kerby, B.A., LL.D., principal of Mount Royal College, where the bride was formerly a student, and the pianist was Mr. P. L. Newcombe. The bride, who was given away by her father, looked lovely in a costume of satin brocade crepe in shades of yellow and mauve, with which were yellow hat and shoes and carried a corsage of Madam Butterfly roses, gladioli, lily of the valley and white heather. She also wore her mother's very old amethyst and diamond bracelet. She was attended by Miss Esther Clappison, of Rose-dale, who wore a navy blue sheer redingote, white hat and accessories, and carried a corsage of Jonathan lilacs. The best man was the groom's brother, Mr. Reginald Allen, of Wayne. During the signing of the register, Mr. A. E. Williamson, of Irricana, gave the toast to the bride, accompanied by Mr. Newcombe.

Following the wedding, a reception for the guests was held at the home of the bride's mother, Mrs. E. L. Williamson, in the private dining room of the Tea Kettle Inn. Receiving with the bride and groom were the bride's mother, Mr. and Mrs. E. L. Williamson, and an important number of guests, including Mr. and Mrs. E. L. Williamson, of Irricana, who were a navy blue and white ensemble, white hat and a corsage of Tallman roses. The wedding breakfast was served at 12 o'clock in a room of the hotel, which was beautifully decorated with cut flowers and centred with a three-tiered wedding cake. The toast to the bride was appropriately proposed by Dr. Kerby, and several cables and telegrams of congratulation were read during the reception.

The bride and groom left later by motor for the Pacific coast, where the honeymoon will be spent. The bride's travelling costume was an imported ensemble, the frock in blue, beige and white, with a wide collar and accessories in dark Paris rust.

Mr. Allen is a graduate of the University of Alberta and has been principal of the Victoria school for the past two years. He has recently received the appointment of vice-principal of the Victoria school. His return from the coast, Mr. and Mrs. Allen will take up permanent residence in Coleman.

JEMPSON-HADLEY

A pretty wedding was solemnized in Coleman, on Thursday morning, Wednesday, August 10, at 6 p.m., by Rev. Harvey Morrison, when Gwyneth Jemison, only daughter of Mr. and Mrs. James Jemison, of Coleman, became the bride of Mr. James Jemison, only son of Mr. and Mrs. James Jemison, of Coleman.

The strains of Lohengrin wedding march, the bride entered the church on the arm of her father, who was singing and dancing was enjoyed. Her charming in a floor length gown of pale blue starch chiffon over taffeta. Her silver Juliet cap was enhanced with a shoulder veil of green, with matching accessories. She carried a bouquet of sweethearts.

The bride's only attendant was Miss Isabel Jemison, sister of the groom, who chose for her gown pale pink lace and chiffon, with matching accessories. Her bouquet was composed of blue and pink sweet peas.

Mr. Wm. McTavish, cousin of the groom, was groomsmen. The ushers included Mr. T. Kirkpatrick and Mr. Jack Dennett. During the signing of the register, Mr. Peter Kirkpatrick sang the beautiful song "Because."

Following the ceremony, the guests gathered at the York hotel, where covers were laid for twenty-five. The bride's table was centred with a three-tier wedding cake and lovely flowers. Later the guests went to the home of Mr. and Mrs. Jemison, senior, where singing and dancing was enjoyed.

The bridal couple left for a short honeymoon to Banff and coast cities, the bride travelling in a St. James bus, topped with a green, light coat and accessories to match. On their return they will take up residence in Calgary.

Out-of-town guests included Mr. and Mrs. James Hadley and Mr. and Mrs. Tom Jones.

BUSINESS CHANGE

Mr. A. M. Morrison is leaving Coleman for an indefinite period. During his absence, his insurance business will be carried on by Mr. Robert Pattinson. The office will not be removed, and you are invited to continue the cordial relations Mr. Morrison established over a quarter of a century ago. Mr. Pattinson will be glad to render you first-class insurance service, plus the best and strongest companies.

Mr. Paul Barnes, of Calgary and formerly of Coleman, a party of friends, was seen fishing at the Cowley bridge on Sunday. Mr. Barnes exhibited to a number of local rod and gun club members his fishing reel valued at \$100. One of the members reports "it was a honey."

Coleman School District No. 1216

Important Notice To Taxpayers

The 10 per cent. discount on all current taxes in the Coleman School District, No. 1216, which expiry date was Monday, August 8, has been extended for one month, until Thursday, September 8.

GLADYS LEES, Secretary-Treasurer.

SPORT NOTES

DRUMHELLER MINERS TO STRENGTHEN TEAM

The Drumheller Miners, like other teams in the Alberta hockey league, are building what they think is a potential Alberta title winner.

Reg. Bentley, who played for Moose last year, is expected to be the best import to date. He is expected to patrol the left wing. Reg. will play on the same line as his brothers, Max and Scoop, providing Roy Bentley, who is slated to coach the team, decides not to play. Judging from the comment in Bob Sheridan's column in the Drumheller Plaindealer, Gus Gustason, Miners' number one man for the past decade, must be slipping. Gus was coach of the team last year, but bids fair to be supplanted by Bentley this season.

Three prospects are being considered for goal, but no definite decision has been made. Two new imports will be brought in to build up the defense, while five local men, among whom is Gustason and Bill Wright, will fill it out for the second round league.

TRAIL TO TOUR EUROPE

Trail Smoke Eaters, as expected by all hockey fans, will sail in November for a tour of Europe. Announcement was made this week by A. W. McDonald, president of the British Columbia hockey association.

Trail executive have promised to place another Trail team in the Kootenay hockey league, but regardless of the calibre of the team, they would lack the color and reputation of the Smoke Eaters.

Kimberley are well aware of this fact, and are reported anxious to go to the aid of the Trail team. They used their influence last year to pave the way for Alberta's hockey orphans, Coleman and Lethbridge, to play in the Kootenay league, and it is a safe bet that Coleman and Lethbridge will be every-ready to help Kimberley admitted into the Alberta league.

The Churches

ST. ALBAN'S CHURCH

Sunday next—Tenth Sunday after Trinity, Evening Prayer at 7 p.m.

"Let your purpose be not to be ministered unto, but as in the case of Jesus Christ, to minister to the human life about you. As Christian people it is our vocation to reproduce the life of Jesus Christ on earth, so that men may see—not away off yonder, in Galilee, nineteen hundred years ago, but here now, in flesh and blood, before their very eyes, something like the spirit of Jesus Christ moving on earth, to reproduce it in the society about us, in our social and political life. We must try not merely to be called by His name, but to have His spirit in our hearts, His deep sense of God, His broad and active and constantly flowing sympathy with men, His purity, His reverence, His courage under trial, in the presence of temptation and danger. That is not only the true Christianity; that is the true humanity. The ultimate aim of the Christian religion is the ideal excellence of our human existence in this world. Oh, men and women, believe in it; the Christian life and the human life are one!" (Blashop Greer).

This church welcomes strangers.

THE SALVATION ARMY

Capt. and Mrs. F. Hewitt

Sunday—11 a.m., Holiness meeting; 3 p.m., Sunday School; 7:30 p.m., Public service.

Evangelist and Mrs. R. B. Taylor will conduct the morning and evening service on Sunday.

Tuesday—7:30 p.m., Home League (women's meeting).

Friday—7:30 p.m. Young people's meeting.

CHURCH OF THE NAZARENE

The friendly church on Main street

pastor, Rev. C. H. Moore, has a lay assistant and organist, Gunnell Berglund.

SERVICES—

Sunday, 11 a.m., Sunday school with

league. Calgary, knowing which side of their bread is buttered, will not doubt lend a supporting hand, since a team with Kimberley's reputation is not to be sneezed at, especially at the box office. We know.

RAIN CAUSES POSTPONEMENT OF TENNIS TOURNAMENT

Rain prevented the appearance of Clareholm tennis players here last Sunday. They phoned the Blairmore telephone exchange early Sunday morning, asking about weather conditions at the courts for Clareholm's arrival, since the weather conditions were then ideal. Upon phoning they found that their guests had called the trip off.

DRUMHELLER AND OLDS HAVING FINANCIAL DIFFICULTIES

As intimated in this column two weeks ago, had put a crimp in the plans of Olds hockey team. They, with Drumheller, are finding difficulty in seeing their way clear to finance their team on road trips. These teams, at no time in sympathy with Coleman and Lethbridge's entry into the league, argue that the expense is too great. Calgary are quiet on the matter. They can finance their team and knowing where the best hockey teams are situated—in the south—are hoping that the league will operate as planned.

No information has been received by Coleman executive that Turner Valley may not operate as intimated in a Calgary paper on Monday.

Meanwhile Coleman continues to build their hockey team, Ben Rees, arriving in town on Monday morning.

Many enquiries have been received, asking how Calgary can sign seven imports with still more to come. The answer is they can't.

Elks' Ticket Sale Heavy

Eight Girls in Quest of Title "Carnival Queen." New Novelities to Feature Carnival.

The Elk who thought about the idea of crowning a "carnival queen" at the forthcoming Elks' carnival is to be congratulated on such a brilliant idea. In the mad rush to win that honor eight girls, six local, and their ladies in waiting, have put on a campaign which hockey fans will see a new high in ticket selling. So great is the demand that the Elks have notified The Journal that more tickets will have to be printed.

The candidates for the honor include Winnifred Mitchell, Freda Antrobus, Albino Michalsky, Dorothy Corrie, Elsie Carmichael and Laura Antle, all of Coleman; Nancy Simons, Bellevue, and Joan Askew, of Natal. While buying tickets on the beautiful 8-piece chesterfield suite, \$100 bond or cabinet radio, buy them from the girls and help one of them win the honor of carnival queen. In addition to which she will be presented with a handsome and expensive Bulova watch.

Latest novelty numbers from the large midways are being chosen for the local carnival so that young and old will receive entertainment.

Classes for all; only two more Sundays for the contest. Morning Worship, 12 noon with sermon by the pastor, subject "Stewardship of God's Plan." Evangelistic Service at 7:30 p.m., special music, duet by the Grant sisters.

Tuesday evening at 7:30, prayer meeting.

Prayer at 7 p.m., organization of the Junior Missionary Society. All children are sure to be present at this service, August 19th; 7:30 p.m. Bible study; at 8:00 p.m., regular monthly church board meeting. All board members please take notice.

"IT IS THE NAVY!"

"Jack's the boy for work, Jack's the boy for play." Jack's the boy when girls are sad, To kiss the tears away; Hard as nails afire, Best of friends ashore, Jack's the boy, so all about (the last line we've forgotten).

This old ditty is recalled as H.M.S. York, of the British navy West India squadron, steams through the narrows of Vancouver harbor and berths for a few days stay.

And the sailors, as well as the officers, enjoy a visit to this friendly city of Vancouver, where so many people come from all parts of Canada, and the States to spend their summer holidays.

Social events for the officers and their wives, both on board the cruiser and ashore at various clubs and private homes are the order of the day, while the sailors and marines engage in sports with city teams, included in which is the game of cricket, dear to the hearts of English people the world over.

Shore leave for the sailors is freely granted, they being given permission in turns throughout the day. And in the evenings, one is reminded of "Jack" in dear old "sunny England" as sailor boys stroll along the streets with their girls leaning on their arms, the girls apparently being proud of their new conquest.

Life aboard a ship of the "King's Navy" is in some respects similar to life in a small community on land. There are nearly 700 men and officers on H.M.S. York, and their duties throughout the day, whether afloat on the high seas or in port, keep them well occupied. A feeling of pride surges through one in looking over a grim cruiser of the navy, and brings home the realization that Britain's safety from encroachment of foes depends in very large measure on a navy that has no equal among the nations of the world.

"It is the navy, the fighting navy, the navy that is the backbone of the empire."

Our old song, Britannia rules the waves.

We still can sing today.

Adam Walker Wins Fishing Club Prizes

Wine Three Competitions; Barclay and Thomas Other Winners.

Coleman Rod and Gun club held their second outing of the season, when thirteen members motored to the Cowley bridge. Fishing was good and a number of good catches were made.

Adam Walker walked off with the lion's share of the prizes, as he took first prize in three competitions, with the best speckled basket, the biggest speckle and the biggest bull trout. His greatest achievement of the day was when he hooked what he thought was a young whale. The "whale" proved to be a monster speckled trout, which weighed 3 pounds, 3½ ounces, when cleaned. This fish places him in the lead for the heaviest speckled fish, for which the club has donated a rod for the best fish caught during the season.

James Barclay and George Burdell tied for first place in the heaviest mixed basket competition, James Barclay winning out on the toss of a coin. Edgar Thomas won the competition for the biggest grayling. The next competition will be held in two weeks.

Town to Hard-Surface Roadway At Bluff

Provincial Government Agrees to Pay Cost of Work in Fall.

The stretch of government roadway, approximately 100 yards long, separating Second street from West Coleman and running between the bluff and the C.P.R. tracks, will be hard-surfaced. Material is being located there and work will start within the next few days.

Mayor Pattinson, with the full support of his council, has on numerous occasions requested the provincial government to hard-surface this stretch of roadway so that the pieces of hard-surfaced road laid by the town could be joined. This the government has persistently refused to do, pleading lack of funds. Recently they informed the council that if the town of Coleman would hard-surface the road in question the government would foot the bill in the fall.

Mayor Pattinson states that \$600 will be necessary to hard-surface this stretch, which is being done immediately. Cost of the road will be paid by the town upon completion and the bill sent to Edmonton where the highways department will make final settlement with the town.

Street Surfacing Making Rapid Progress

Workers are making rapid progress in hard-surfacing the streets in the residential part of town. Sixth street has been completed for some time and the work is almost completed on Fifth street, there being approximately a one-hundred-yard stretch to level, the gravel and oil already being mixed.

Work is now being done on Fourth street, from the tennis courts to Jack Williams' residence, and the government grader is expected to appear on the scene any day to spread the mixture.

Since a number of water pipes have to be dug up at the east end of Third street, and time is growing short, present plans call for hard-surfacing the stretch of road from Joe DeCunzio's residence to the main avenue running alongside the Morrison residence.

A local angler caught a three-pound rainbow trout at the lake recently.

Warning

A number of boys who either lack common sense or decency are again causing much damage to the arena. If they would take two minutes to think that every board they damage takes money to replace perhaps they would not be so quick to destroy.

If any boy is caught damaging the rink, steps will be taken by the rink management to prosecute, as too much damage is being done to the building and it has to stop.

The Fate Of Democracies

Shrouded in obscurity though the ultimate outcome may be, the future destinies of the democracies in a world riven with external strife and internal struggles, will be determined by the prevailing viewpoint of a mass of individuals comprising those nations who pin their faith to the doctrine of self-government.

The die may be already cast for those countries which adhere to the democratic ideal, who believe in and practice freedom of thought and speech and the right of the individual to govern himself, but before their future can be predictable with any reasonable degree of certainty, cohesion of thought and action must develop and objectives must be crystallized in the public mind.

When a world horoscope is attempted one may well say: "Now we see through a glass darkly," but if trends of thought and utterance are an indication of future status, within a few years the enveloping haze may clear and the goal stand out in sharp definition, sufficiently clear cut to show a straight course. When the milling of the multitude has ceased and the chaos of ideas has merged into a distinct channel, then, and not until then, will it be possible to say whether we are heading.

Straws May Show The Way

What direction this channel, when it becomes defined, will take, it is difficult at this juncture to state, but once in a while someone expresses a thought which may give direction. Such a one is the Attorney-General of Australia, R. G. Menzies, who recently gave utterance in London, England, to suggestions which might possibly be regarded as a straw showing which way the wind may blow, or even as a milestone on a broad highway, to a specific objective.

The basic idea behind Mr. Menzies' utterances is unification of the ideals, purposes and policies of the integral parts of the British Empire, founded on a better understanding by the peoples of these units of one another's aspirations and objectives. And the achievement of this result he suggested would have to be based upon two elements, which he outlined as follows:

"1—A government in Great Britain which recognizes that on all large matters, particularly those of international policy, it is speaking, in fact, not only for the inhabitants of these islands, but for British people all over the world, and, therefore, realizes that it must, as far as possible, before arriving at any decision, invite dominion criticism and attach proper weight to dominion views.

"2—The governments in each of the dominions which realize that as members of a closely-knit family of nations they are responsible, not only for the wise handling of their own problems and policies, but also for an effective contribution to a wise Empire policy and real Empire security.

"In other words," said Mr. Menzies, "let us all realize that the independence of each of us is to some extent dependent upon the independence of the others. Let us more and more think in terms of British unity and how we can make it an effective instrument for peace and justice in the world."

The Danger Of Sectionalism

With dictatorialisms of one sort and another apparently flourishing in some parts of the world and warlike aggressiveness ruling the roost in other sections of the globe the question of security for peace-loving democracies may at any time become a vital issue, but such security cannot be built up overnight and to be effective and enduring it must be based on complete understanding and unity of purpose.

To give point to the assertion one is reminded of the fable of the old man who called his sons together as death approached and urged them to pool the resources he was leaving them, pointing out that if they stuck together no harm could befall them. He illustrated his precept by handing each of them a bundle of sticks bound together with instructions to break them. The boys found it impossible to do so, but when the sticks were separated they were snapped assunder with ease.

An effective unity cannot be built up if the elements which should comprise it are isolationists or are engaged in the promotion of sectionalism, provincialism or even a narrow nationalism. As Professor A. R. M. Lower of Wesley College, Winnipeg, aptly expressed it at a recent conference on economics and politics: "A proper degree of civic pride is good, but when it goes too far it becomes parochialism and endangers the nation's integrity." Similarly in a wider field he might well have pointed out that a narrow nationalism endangers Empire integrity and the destruction or impairment of Empire integrity, is an equal threat to the security of its component parts.

Dog Was A Hero

Clarence Boner's collie dog is pretty much of a hero around the Boner farmyard in Jerseyville, Ill. Boner said that when a fire destroyed \$5,000 worth of barns and property, the dog not only ran into the burning buildings and chased two cows and their litters outside, but forced the pigs out of the way of falling embers and into a nearby pond.

It is estimated that the primitive herds of buffalo roaming the American plains, numbered about 75,000,000 animals.

WILSON'S

FLY PADS

REALLY KILL

One pad kills flies all day and every day for 2 or 3 weeks. 3 pads in each packet. No spraying, no stickiness, no bad odor. Ask your Druggist, Grocery or General Store.

10 CENTS PER PACKET
WHY PAY MORE?
THE WILSON FLY PAD CO., Hamilton, Ont.

Had Long Distance Memory

"Can you cast your mind back to the days before the war when women were still without the right to vote?" asked Holmes.

"I can," replied Gray.

"Do you remember how amazed everyone was when Bleriot succeeded in flying the Channel?"

"I should think I do!" said Gray.

"Can you recall still earlier the night news was received of the relief of Mafeking?"

"Oh, rather! What a night!"

"Do you remember," said Holmes impressively, "that a fortnight ago I sent you five dollars?"

"I'm sorry, old chap," apologized Gray, "but to tell you the truth, I had been forgotten."

Ancient Account Book

In medieval England, a notched stick was the baker's "account book." He gave a stick to each customer and cut a notch for each loaf delivered. Customers paid for as many loaves as their sticks showed notches at the end of the week.

A breed of sheep having no wool on the face and legs has been developed at South Dakota State College.

Our present paper making methods are an evolution of the ancient Chinese methods.

Legumes Should Be Used

In Order To Get Necessary Nitrogen Back Into Soil

So far as known, the members of the legume family (clovers and vetches) are the only plants which possess in any marked degree the faculty of absorbing and fixing the nitrogen of the air. There is a vast supply of this element in the atmosphere. In contact with but unavailable to our corn and potatoes. It is a case similar to that of the "Ancient Mariner" who exclaimed, "Water, water everywhere, nor any drop to drink!"

Think of it! The atmosphere contains 78 per cent. of free nitrogen—free in the sense that it is uncombined with the oxygen. Then consider that the infinitesimally small amount of carbon dioxide gas in the atmosphere is assimilated by the leaves of plants and is the source of the carbon which constitutes the bulk of their dry matter. Consider again the millions of dollars spent in the construction of factories which by electro-chemical means fix atmospheric nitrogen in forms suitable for use as fertilizers. The moral of the tale is that the fullest possible use should be made of legumes—clovers, alfalfa, etc.—in cropping systems. Remember that they will gather nitrogen not only for their own needs but for that of other plants growing with them or after them. In order that our nitrogen factory in the soil may function properly we must see to it that the plants are not deprived of the necessary supply of phosphate and potash.

Hard Weed To Fight

Ontario Dairyman Tells How To Get Rid Of Mustard

Mustard is a miserable weed to fight. The only seed will stay in the soil for years and a crop will appear when the battle was supposed to have been won. Wm. Muir, Oxford county, Ont., dairyman, has gotten the upper hand on a farm that was very bad with mustard years ago. He has followed much the same procedure all over the farm. First he plants corn in hills so that it can be cultivated both ways. The necessary hard hoeing is done to insure that no mustard gets a chance to go to seed. As soon as the corn is in the silo, the tractor and teams are turned into the corn stubble which is turned over, worked and seeded to fall wheat. There will be a crop of mustard in the wheat but wheat has the advantage of being harvested before the mustard has had a chance to mature. The wheat stubble is plowed immediately and the land worked through the summer and fall. Next spring the crop is oats or mixed grain seeded to clover. The clover is not a great deal of mustard in this crop and what there is, is pulled by hand.

Some Simple Rules

Tell How You Can Get Yourself Thoroughly Disliked

The Rev. G. R. Balline, vicar of St. James' Church, Bermuda, B.E. London, gives these hints in his church magazine on "How to get yourself disliked."

"Let the other fellow see that he does not amount to much.

"Deplore his taste, criticize his friends, sniff at every idea he advances.

"Try to arrange other folks' lives for them.

"Point out how badly they are botching things, unless they follow your advice."

Must Be Absent Minded

Picnics Left Their Reader At Ontario Parks Resort

Parks employees are accustomed to being asked to find odds and ends left behind by picnickers. Recently Parks Superintendent Hill, of Galt, Ont., had a tall order. By long distance telephone from Toronto, he was asked to locate a green reader left in Soper Park after a week-end picnic. The car was found on one of the islands in the north of the park, and returned to its owner.

Lasted Seven Days

Some wedding ceremonies on this continent may seem elaborate but over in Hungary a recent wedding lasted seven days during which 400 guests consumed four oxen, six hogs, 1,500 eggs and 3,000 litres of wine.

Theodore Roosevelt was the first President of the United States to fly in an airplane. He went up in a plane similar to the one the Wright brothers first flew.

The catfish of the African swamps is the only fish which will swim upside down; other fish found in that position are either dead or dying.

The book with the saddest ending is our bank book.

Tribute To Old Liner

New Mauretania Name Plates Were Voted Until Launching

For all its sturdy reserve the Cunard Line frequently amazes us with a sudden touch of sentiment, says Robert Wilder in the New York Sun. We really coming to believe that the directors are just a bunch of old softies at heart.

When the Mauretania was launched the name plates on her bows were voted. This, if you have ever touched a hauling, is an unusual touch—most of the lines being satisfied with the getting of their ships down the ways. Before Lady Bates touched the button which sent the new Cunardier into the water she pulled a tattered cord, dropping the yells from the brass letters, covered until that moment as a tribute to one of the greatest of ocean greyhounds, the old Mauretania.

We tried to find out what became of the plates from the liner's name, but didn't have much luck. Cunard told us that one man had purchased a complete set and that the other was sold piecemeal one letter going here and another there. We, together with the line, would like to know who has them.

Not A Bad Idea

If Radio Sets Could Be Equipped With Earphones

This letter by S.O.S. appeared in the New York Sun:

The loud-mouthed radio being a sort of conversation on all sides, it occurs to me that if radio sets were provided with outlets for earphones listeners who wished to tune in on some same program could plug in and escape the goofy din coming from the morning, noon and evening jitter bugs.

These disturbances are akin to the pests who, rather than get out and bring a doorbell, honk their auto horns on Sunday mornings when most of us are just about to turn over for another snooze. A plague on both their houses.

Broadcasting stations could start a be-kind-to-your-neighbor-week and coax these noisy booms to try the "thrilling sensation" of loud noise plus radio privacy obtained by the use of earphones, and if some Hollywood idol endorsed the movement the loud would sweep the country like wildfire.

SELECTED RECIPES

CHOCOLATE SPONGE CAKE (Four Eggs)

4 squares Baker's Unsweetened Chocolate
1/2 cup sugar
1 cup milk
1 egg
1/2 cup vanilla
1 1/2 cups sifted Swans Down Cake Flour
2 tablespoons Calumet Baking Powder
1/2 teaspoon salt
1/2 cup milk
2 tablespoons water
4 egg yolks
1/2 cup sugar, stiffly beaten
Add chocolate and sugar to milk in double boiler, and cook 10 minutes, or until smooth and thick, stirring constantly. Cool covered. Stir occasionally. Add vanilla.

Sift flour once, measure, add baking powder, salt, and 1/2 cup sugar and sift together three times. Add water to egg yolks and beat with rotary beater until thick and lemon-colored. Add 1/2 cup sugar gradually, beating until very thick; add 5 minutes. Fold in flour alternately with chocolate mixture, 1/2 at a time, adding chocolate mixture last; then fold in egg whites. Turn into two slightly greased 8-inch layer pans. Bake in moderate oven (325 degrees F.) 30 minutes or until done. Spread Bittersweet Filling between layers and Orange Frosting on top and sides.

BITTERSWEET FILLING

2 squares Baker's Unsweetened Chocolate
4 tablespoons sugar
1/2 cup milk
2 egg yolks
1/2 teaspoon vanilla
Melt chocolate in double boiler. Add sugar and blend. Add milk very gradually, stirring after each addition until smooth and blended. Add egg yolks, one at a time, beating well after each. Continue cooking and stirring 2 to 3 minutes, or until thick enough to pile up slightly. Add vanilla. Cool, stirring occasionally. Makes enough filling to spread between two 9-inch layers. Double above recipe for enough filling to spread between three 9-inch layers. For all-chocolate cake, spread between chocolate layers and spread any favorite chocolate frosting on top.

An extensive search for oil is to be made in New Zealand and several companies have been granted drilling licenses. One company which will soon begin drilling operations is bringing a plant worth \$350,000 from Australia.

A woman writer advises: "Whenever I am in the dumps I pick myself out a new hat." So that's where they find 'em?

A Strange Case

High Temperature Apparently Normal For South Africa Man

A Natal man living in Harrismith claims to be the "hottest" man in South Africa. Five years ago it was discovered that he was "running a temperature." He was put to bed, the diagnosis being "flu. He did not respond to treatment, and the next diagnosis was a chronic case of appendicitis. The appendix was removed, but the temperature remains, and his tonsils and a fistula operation followed in quick succession. Still the temperature remained. Then commenced a round of the leading heart, nerve, tropical disease and other specialists in Johannesburg, but the temperature remained. This was followed by a period in Johannesburg General hospital, where other specialists examined him, and eventually he was handed over to the South African Institute for Medical Research, but there, too, all tests, blood counts, and so on, proved to be negative.

After five years the doctors have come to the conclusion that he is a freak, a man who walks around at a temperature which every day averages anything between 99.2 and 100 degrees—a temperature which would send any normal man to bed.

Definition Of Advertising

Mighty Force Which Will Keep Business On The Move

Advertising is a mighty force to which we become exposed the moment our father puts our birth notice in the newspapers, Harold M. Gulley, vice-president, Silverwood's Toronto Dairy Ltd., Toronto, told members of the Rotary Club at a recent noon-hour meeting. The average accountant may say it is a questionable expense since you cannot always trace results, and the experienced manager may say it is an unnecessary necessity, added Mr. Gulley, "but call it what you will, advertising keeps your stock-in-trade from having holidays; it brushes away cobwebs and dust, amazes shop windows, quickens the knowableness of salespeople and lets in the sunlight."—St. Thomas Times-Journal.

A Special Command

"Halt!" yelled the sergeant to a new squad of recruits. But one of them marched on.

"Here, Jones, what were you doing before you joined the army?" yelled the sergeant.

"A horse driver, sir," replied Jones. When the squad was marching again the sergeant cried: "Squad halt! Jones, whoa!"

Nearly all of Canada's commercial crop of grapes is grown in the Niagara Peninsula, Ontario.

Baseball originally was played with a flat bat.

One Solution Of Problem

How To Ease Your Conscience When Fasting On Counterfeit Coin

From Le Soroleis, of Sorol, P.Q., comes the solution of a rather common problem in ethics and finance. While the solution is ingenious, it may be as well to state that neither Le Soroleis in publishing it nor The Printed Word in making a free translation, endorses the morality involved.

The problem is stated thus: "Someone gives you a counterfeit fifty-cent piece. What do you ordinarily do? You attempt to pass it on to another dupe. Don't deny it; on this point we are all alike. But the catch is that, nine times out of ten, you don't succeed. So, discouraged, you put the piece away in a drawer and decide to stay honest in spite of your efforts."

Here is how the correspondent of Le Soroleis meets the situation. He says: "A customer buys from me an article worth 25 cents, giving me a dollar bill in payment. I must give him 75 cents in change. I put together my bad fifty-cent piece plus 35 cents in good money, making 85 cents in all, in place of 75. The customer, seeing that I have given him ten cents too much, hurriedly puts it all into his pocket, for fear that I shall see my error. My piece is gone, with a loss of ten cents, if you like, but at least I am rid of it. I do not have to reproach myself for cheating my customer, since he himself has been dishonest enough to cheat me. Thus I live in peace with my interests and my conscience."

Confidence Men Trapped

Man From Scotland Yard Posed As Foreign Tourist

A fake Tyrolean tourist has put the fear of the law into London's "sharepushers" who sell worthless stocks to visiting yokels.

Scotland Yard dressed its most German-looking detective in a good costume Tyrolean hat and spectacles. It then sent him with a full of guide books to see the sights.

Confidence men, seeing a man who appeared to be a wealthy old as well as a foreigner who might have language trouble, made for him with keen expectations—only to be "conned" themselves and arrested.

Natural Indignation

During the two-minute period of silence last Armistice Day in Manchester, England, an airplane buzzed noisily over the city with an advertising trailer reading, "Eat Blank's Peas." So and so indignation were the citizens that sales of that particular brand of peas have since fallen off to a whisper all over England.

The eruption of Mont Pelee, in Martinique, West Indies, in 1902, destroyed 30,000 human lives in 15 minutes.

United States Secretary Of Agriculture Urges Wheat Export Subsidy

Washington. — Agriculture Secretary Wallace is working on a proposal to place at least 100,000,000 bushels of surplus United States wheat in world markets by means of an export subsidy, informed officials said.

Details of the proposal are being guarded closely, it was said. The policy of subsidizing exports has been criticized in the past by the state department and there was speculation as to whether Secretary Hull would carry objections to President Roosevelt.

The competitive situation developing in the world's grain markets, and prospects of a record-breaking surplus of United States wheat and declining domestic prices, were said to have influenced Wallace's undertaking.

He hinted at a meeting of state farm leaders he had such a proposal in mind.

After pointing out that during the past marketing year the United States exported about 98,000,000 bushels of wheat, which he described as about the United States share of world trade, Wallace said: "Present prospects are that we won't have nearly as favorable an opportunity this coming year and there is grave question as to whether we will be able to put more than 50,000,000 bushels on the world market unless we take some special types of action designed to hold on to our fair share of the world wheat trade."

It was said Secretary Wallace favored subsidies only on sufficient wheat to obtain what he declares to be the United States share of world markets.

State Secretary Hull has opposed export subsidies on the ground they would lead to retaliatory measures by other countries and thus increase world trade barriers.

Outlook Is Encouraging

Lord Runciman Found Czech Situation Better Than He Expected

London. — Viscount Runciman has found reason for encouragement in his efforts to find a peaceful solution of the minorities problem in Czechoslovakia. Havas said it was reliably reported.

Persons close to Prime Minister Chamberlain told Havas he had received a letter from Lord Runciman, whose status is unofficial, saying both Sudeten Germans and Czechoslovak government representatives had shown themselves less uncompromising than he had expected.

Leaves On Trade Trip

Hon. W. D. Euler Will Survey Canadian Marketing Services

Ottawa. — Hon. W. D. Euler, minister of trade and commerce, has sailed from Quebec for a six-weeks' trip to Great Britain and the continent for a survey of Canadian marketing services and publicity in Europe.

The minister will go to London, then proceed to the Glasgow exhibition where Canada has an exhibit. Later he will go to the continent.

Government Will Have Full Supervision Over Canadian Airlines

Ottawa. — Canadian airlines will be brought under jurisdiction of the board of transport commissioners within six weeks, Transport Minister C. D. Howe announced. Passenger and freight rates on the airlines will be subject to a control of the sort now exercised over railways.

"Undoubtedly it will help in meeting some of the difficulties of the airlines operating into northern Canada," said Mr. Howe. "There will be a forum to which the plane operators will be able to take their difficulties."

The recent session of parliament passed a measure transforming the board of railway commissioners into a transport board with general authority over the carriage of passengers and freight by railways, steamships and air lines. The provisions affecting air services were to become effective on proclamation. This will come within six weeks, said Mr. Howe.

For some years, and particularly in recent months, complaints have come to the civil aviation branch of

the transport department that due to the keen competition among private air carriers for the business of carrying passengers, freight, express and mail into the north the rates have been cut so low the companies were losing money.

Some years ago J. A. Wilson, controller of civil aviation, had representatives of the private operators in Ottawa when an association was formed which it was thought would avoid ruinous competition in the future. According to reports reaching the department, it has not been successful and it is believed here once the transport board has authority to function in relation to air traffic, a schedule rate to all may be worked out.

The government has been blamed because of the rates it pays private companies for carrying mail. The post office department accepts the lowest tender and generally the rates are much lower than will be paid the Trans-Canada Airways for carrying mail across Canada.

Valuable Cargo Seized

Schooner Carrying Liquor Taken Outside OM Three-Mile Limit Halifax. — First victim of Canada's newly-extended rum-running regulations, the 35-ton Newfoundland schooner, Nellie J. Banks, with a \$30,000 liquor cargo aboard, was escorted to Charlottetown by the Royal Canadian Mounted Police cutter Ulua.

Police said the schooner, arrested off Shore Point, near Prince Edward Island's eastern tip, was laden with 225 cases of alcohol, 50 kegs of rum, 20 cases of gin, 34 cases of whisky and 20,000 cigarettes. Value of the cargo was estimated unofficially.

Until the preventive division of the R.C.M.P. was armed with its new powers, she would have been hove-to in perfect safety.

The new regulations permit Canadian officers to board and search vessels of British registry under 500 tons within 12 miles of the coast. Previously they had authority to search outside the three-mile limit only vessels of Canadian registry.

Police identified the owner-skipper of the schooner as Isaac Illington of Newfoundland.

Planes For Britain

MacLennan Supplied By Canada Will Be All Of Same Type

Montreal. — According to present plans Canadian plane manufacturing plants will all make the same type of plane for the Royal Air Force, Sir Samuel Hardman Lever, head of the mission the British air ministry sent to Canada, said.

Individual factories will make only certain parts of the planes, which will be assembled at another plant, the British air official declared. Capital for the assembly plant and for any expenses in connection with making the plane parts in Canadian factories must be provided by the Canadian industry, he said.

Preparing For Air Tour

Game Officials To Start On Duck Census In West

Winnipeg. — President John C. Huntington and Vice-President A. M. Bartley of More Game Birds in America, New York, are in Winnipeg preparing for a 16,000-mile air tour of western Canada to take a duck census.

Ducks Unlimited (Canada) are sponsoring the project and officials of that organization will accompany Bartley and Huntington in their flights. First leg of the tour will be piloted by Tommy Lamb of Winnipeg To The Pas, northern Manitoba mining town.

Worth Thousands Of Dollars

Marijuana Weed Destroyed In Point Pelee National Park

Point Pelee, Ont. — More than a ton of marijuana weed, worth at least \$280,000 if converted into "dope" cigarettes, has been pulled up and destroyed during the past week in Point Pelee National Park, authorities here announced. Discovered by park authorities 10 days ago, the hemp plant which produces the narcotic has been eradicated over a six-mile stretch in this lower Essex county district.

Shortage Of Teachers Seen

Winnipeg. — Possibility of shortage of school teachers in western Canada was predicted in a report of the Alberta Teachers' Federation to delegates of the 17th annual Canadian teachers' convention here.

Date Set For Thanksgiving

Ottawa. — Thanksgiving Day in Canada will be celebrated this year on Monday, Oct. 10, a proclamation fixing the date having been published in the Canada Gazette.

WOULD RE-OPEN IMMIGRATION

Sir Henry Page Croft, M.P., photographed upon his arrival at Quebec on the Canadian Pacific liner Empress of Australia, has come to Canada to explore the political possibilities of the re-opening of immigration from Great Britain. Sir Henry, who is chairman of the Empire Industries Association and in 1933 headed the Empire Settlement and Development Research Committee, which recommended a large scale re-settlement in the Dominions, was invited by a group of municipalities in British Columbia to come to Canada for the purpose of discussing re-opening of immigration.

Record For Harvesting

Made By Three Men On Farm In Australia

Melbourne, Australia. — A world's harvesting record has just been made by three men on a crop of 700 acres in the Wimmera wheat belt of Victoria, Australia.

Using a modern "auto-header," which strips the head of grain and bags them in one operation, they harvested 3,300 bushels in one day. They began at 5:45 a.m. and finished at 8:45 p.m. For hurried meals the crew dropped from the machine singly, and the driver not at all. The machine was stopped only at intervals for removing the bagged grain and for oiling parts of the mechanism. The yield of wheat was 43½ bushels to the acre.

Appointment Announced

Dr. T. W. Grindley Is Secretary Of Canadian Wheat Board

Winnipeg. — Dr. T. W. Grindley of Ottawa, who was secretary to Mr. Justice W. F. A. Turgeon during the recent royal commission inquiry into the grain trust, has been appointed secretary of the Canadian Wheat Board.

Official announcement of the appointment was made by the board which also announced Ray E. Lee of Vancouver, former manager of the board's office in that city, would be reappointed with reopening of the office to handle wheat shipments to Pacific ports.

A. M. Millard of Calgary will re-establish the Calgary office to take care of the Alberta trade of the board.

Would Provide Work

Manitoba Has Plan For Training Course For Graduates

Winnipeg. — A. MacNamara, Manitoba deputy minister of labor, announced the provincial government had submitted to the Dominion government for its approval a plan whereby more than 4,000 Winnipeg high school graduates would be employed by garment manufacturers to receive a six-week training course. The province would contribute a fixed subsidy to bring wages to the minimum level provided Dominion government approval was forthcoming for use of funds under the youth training scheme.

British Pressure On Italy Has Put Franco In Awkward Situation

Brought Patient To Hospital

Flew About 1,200 Miles

Through Rain And Fog

Arctic Bay, Baffin Island, N.W.T. — Father Paul Schulte, a German aviator in the Great War, roared out of the Arctic skies on a mission of mercy, carried a stricken missionary to his plane and headed back less than four hours later for Chesterfield Inlet, 800 miles to the south.

The flying priest, engaged in one of the Northland's most thrilling mercy flights, brought his plane down here at 10:25 p.m., E.S.T. Father Chochoard, seriously ill of fever, was placed aboard and Father Schulte took off for Chesterfield at 2:15.

When the mercy plane reached here, Father Schulte and his mechanic, Brother Beaudoin, had flown about 1,200 miles through rain and fog from Churchill.

Father Schulte was at Churchill, Manitoba's port on Hudson Bay, when he learned of Father Chochoard's illness. The flying priest started his flight immediately, planning to take the sick missionary to the only hospital in the barren region at Chesterfield.

For Joint Use

Britain And United States Agree On Pacific Islands

London. — The British foreign office announced Great Britain and the United States had agreed on joint use of Canton and Enderbury islands in mid-Pacific for aviation and other communication.

The islands are part of the Phoenix group, about 2,000 miles southwest of the Hawaiian islands, on the air route from Honolulu to Australia and New Zealand.

In what was interpreted as a challenge to the British claim to Canton and Enderbury, President Roosevelt last March issued an order placing them under the jurisdiction of the interior department.

The United States colonized the islands with 11 Hawaiian youths, seven on Canton and the others on Enderbury.

Non-Stop Atlantic Flight

German Transport Plane From Berlin Lands At New York

New York. — Completing the first non-stop flight between Berlin and New York westward over the North Atlantic ever attempted, the four-motored German transport plane "Brandenburg" came to rest on Floyd Bennett airport at 12:53 p.m. M.S.T.

The 19-ton machine, which normally carries 24 passengers but carried only a four-man crew on the 3,942-mile trip from the German capital, had been in the air for exactly 25 hours.

The official time of the flight was 24 hours, 54 minutes, however, because arrival was timed by its passage over the field administration building. The ship circled the field several times before landing.

London. — Great Britain has put discreet pressure on Premier Mussolini and General Franco to hasten withdrawal of foreign fighters from Spain's civil war.

With Premier Edouard Deladier under leftist attack in France for stopping shipments of arms to government Spain, the British government made these two moves:

1. A suggestion to the Italian premier that reports Italy was sending more troops and material to insurgent Spain were prejudicial to the Anglo-Italian accord which is to be effective upon a "settlement in Spain."

2. Advice to Franco that his explanation of delay in accepting the British plan for withdrawal of foreign soldiers was "unsatisfactory." France had said "the intricate nature" of the plan caused the delay.

These two moves appeared to put Franco in a dilemma. If he accepts the British plan he stands to lose valuable help in a critical phase of the war. If he turns it down there is every possibility the French frontier will be opened to a flow of arms to be used against the insurgents.

Recent increased Spanish government activity indicating the war would last through next winter appeared to have made the insurgent general eager to keep every man and gun he has.

There was hope in London the winter stalemate might make it possible to effect a truce.

Prime Minister Chamberlain's position was affected by action of a committee of British shipowners trading with Spain. The shipowners refused to accept terms of the government's proposed inquiry into bombing of British ships in Spanish waters.

A statement issued by the group also asked "His Majesty's government to take steps to demand immediate satisfaction" by the insurgents of the shipowners' claims of damages from bombardments.

The statement added that, contrary to Mr. Chamberlain's statement, the House of Commons July 26, "the insurgents have given no promise whatever to pay compensation."

First Survey Finished

Reports Regarding Anticosti Island Are Being Kept Secret

Port Menier, Que. — The Anticosti expedition of the Royal Canadian Navy and Royal Canadian Air Force has completed its preliminary survey of Anticosti island from a defence objective and is getting down to details as to actual sites for air and naval bases.

Reports of officers concerned have been marked confidential and have been sent direct to Ottawa, where the defence scheme will be worked out.

Secrecy has now been imposed, as is usual in defence matters, and even the owners of the island have no inkling of the outcome nor of what sections of the island will be purchased or expropriated for defence purposes. Ottawa has the predominant right to take over any parts of the island needed.

Military Preparations In Germany Causing Diplomatic Concern

London. — Havas News Agency, said intensive military preparations "reliably reported to be in progress in Germany" were the centre of diplomatic speculation.

Well-informed quarters, said Havas, believed the results of these military preparations published by The Manchester Guardian (Liberal), approximates information now in the hands of the government. The Manchester Guardian's diplomatic correspondent reported military train movements along the Nuremberg-Ulm line, provisional extension of conscript service and the fact all farmers have been ordered to place their horses at the disposal of military authorities by Aug. 20.

"There appears to be no trace of enthusiasm for any kind of conflict," the article said of the German people. "Discontent with the regime is growing steadily and it is being intensified by concern over the international situation."

Whatever the extent of Berlin's military preparations, they were interpreted differently by three schools of thought.

1. Simply as preparations for extensive manoeuvres designed to impress Germany's neighbors.

2. A new sort of warning given openly by the Reich as a psychological stratagem to influence the current trend of events.

3. Mobilization of a war machine ready for instant action should the projected "solution" of Czechoslovakia's problem fail to materialize within "reasonable" time.

Munich's population was much upset by military preparations along the Czech border. Despite official assurances that nothing more than the usual autumn manoeuvres was planned, the public was worried. Automobiles, trucks, furniture vans and even motor cars have been requisitioned by the army.

TRIPPING AROUND VANCOUVER

A Day's Tour of the Famed Fraser Valley—Meeting
Weekly Editors—Beauties of Harrison Hot Springs

Visiting places that you have not before seen, but of which you may have heard, is always interesting. Quite often the impressions you may have gained from hearsay do not give a true picture of these places, and visiting them is the only way in which to obtain it.

So it was with anticipated pleasure that my wife and I left Vancouver early in the morning, in fact earlier than the time we usually commence work in Coleman, and journeyed out about 20 miles to the pleasant town of Ladner, one of the growing towns on the Delta of the Fraser River.

Here we were met by Mr. Edgar Dunning, whom it is of interest to note is a son of Mr. Dunning who started The Journal in Coleman in 1921, and who sold the business to J. S. Barrett, the latter selling to Ernest F. Gare, in 1922, after a brief period in partnership.

From Ladner we commenced a most interesting tour of the Fraser Valley, driving first to Cloverdale, a town in the centre of a prosperous rural municipality. The editor of the Surrey Leader, Mr. Smith, formerly of Greenwood, B.C., extended a welcome to us, and after taking note of the neat appearance of the town, through which passes the fine Pacific Highway, we journeyed through a fine district on the paved highway to Langley Prairie, where another brief stop was made to renew acquaintance with a few old friends. Of course the office of the weekly newspaper is always a good place at which to call, for the editor is "supposed to know everything," and here we met an old acquaintance, a Mr. Cox, who started the Langley Advance seven years ago, and who had just moved his plant into a commodious new building. Another old friend we called on was Tom Yardley, son of the first mayor of Estevan, Saskatchewan, who opened a hardware store in Langley several years ago, and who has built up a nice business.

From Langley we proceeded to Abbotsford, another town of similar size in the Fraser Valley, where we stopped for luncheon and spent an hour with the editor of the Abbotsford, Sumas and Matequi News "read by 2200 families of the district," which gives some idea of the solid settlement around Abbotsford. Mr. Lang Sands, formerly of New Westminster, is the editor, and rather humorously suggested that if we kept calling on the editors of all the towns we visited, we would eventually be able to work our way back to Alberta.

However, Chilliwack being our objective for the day's journey before returning, we proceeded onward, still travelling on surfaced highway, which one could not help contrasting with the dusty highway through the Crows Nest Pass.

Arriving at Chilliwack, centre of a famous dairying district, we found Charles A. Barber, editor and proprietor of the Chilliwack Progress, engaged in the throes of a council meeting of the rural municipality. Though Mr. Barber is mayor of Chilliwack, and occupies several other important offices in various local organizations, he joins in the deliberations of the rural council as well, and is welcomed to their meetings as one of themselves, thereby maintaining cordial relationships between the city and the rural councillors.

After visiting his plant, to which he had recently added a fine new Intertype machine costing \$8,000, giving him two typesetting machines, he entertained us at his fine home a few miles out, which is one of the show places of the district. It is of interest of note that Mr. Barber was born in Chilliwack, and when he was quite young, his parents moved to Ontario, later moving to Manitoba, the reason of their moving from Chilliwack being because in the early days of settlement floods would frequently cover their land. Through flood control and irrigation, this has been overcome and the district is very prosperous.

At 23 years of age Mr. Barber edited a paper in Pilot Mound, Man., subsequently moving back to Chilliwack. In 1935-36 he was president of Canadian Weekly Newspapers Association, and during that time made an extensive world tour, with his wife, and represented the Canadian weekly newspapers at the Imperial Press Conference in South Africa.

Leaving Mr. and Mrs. Barber, we called at the home of William J. Allen, who though only four years resident in the district, has won the championship trophy for the finest Jersey cattle. A lady accompanying us on the trip, Mrs. Barbara Malloch, manageress of the telephone central in Ladner, was an old friend of Mrs. Allen, who was formerly Mrs. Waagen, president of the Red Cross Society in Alberta some years ago, and who remembered Mrs. Andrew McLeod, having visited Coleman in connection with Red Cross activities. Mr. Allen came from Inverness to Canada, and before settling at Chilliwack, was an engineer with the C.P.R. His success is somewhat remarkable and demonstrates what can be achieved by application and study. Mrs. Allen injected a touch of humor into the conversation by remarking that in getting the Jersey cows ready for exhibition purposes, the stables were turned into beauty parlors, where permanent waves and polished hooves and other beautifying touches were bestowed on the patient "bossies," who docilely submitted to such fastidiousness. However, its reward was seen in the fine trophies in the Allen's beautiful home.

From here we turned our way homeward by a different route whence we came. Our pilot, Mr. Edgar Dunning, was anxious that we should see the fine scenery of the drive along the north side of the Fraser River, therefore we proceeded to Harrison Hot Springs, where a splendid health resort is operated throughout the year. Though time was pressing rapidly on, we could not resist the temptation to remain for dinner at this beauty spot on Harrison Lake, famed as "The Spa of Canada." Imagine our pleasant surprise on entering the hotel to almost instantly meet Mr. and Mrs. O. E. S. Whiteside, who were holidaying there. A large number of visitors from all parts of Canada and the States were there, and under the management of vivacious Mademoiselle Marguerite de Guessem, guests were made to feel at home and a most jolly atmosphere prevails. A well-planned routine is sug-

Tripping Around Vancouver

(Continued from Column 2)

gested for guests, particularly those who visit to gain the benefits of the sulphur springs.

"Clear mountain air...seclusion and quietness...a view of blue Harrison Lake, rolling foothills...soaring snow peaks, rugged and beautiful as the Swiss Alps...and mountain and lakeside trails inviting you to explore this beauty..." so runs the description of the attractions of this "resort of distinction in the Evergreen Playground."

Though we had intended to return to Vancouver before darkness enshrouded the beauties of the scenic highway, it was 10 p.m. by the time we left Harrison, but it was impossible to see everything, therefore we made a quick drive to Mission,

where a brief call was made at the \$20,000 club building of the Canadian Legion, where a dance was in progress in their fine auditorium, and which appeared to be a most flourishing and popular centre.

From Mission was continued the journey into Vancouver, passing through New Westminster, an outstanding feature of which is the fine Pattullo bridge across the wide Fraser River. Back into the city whence we had started, a perfect day ended at about 2 a.m. on Sunday morning, when we needed no rocking to send us to sleep.

(The editor of The Journal and Mrs. Halliwell are indebted to Mr. Dunning for the courtesies extended in enabling us to make such a delightful tour, and appreciation is expressed for his unbounded kindness.)

WORLD HAPPENINGS BRIEFLY TOLD

At Port Arthur, Hon. C. D. Howe, minister of transport, was made Chief "Nee-Ga-Nee-Ga-Ba"—chief of the land and the air—by a group of Indians staging a street carnival.

The Helsinki stadium will be enlarged to accommodate 60,000 spectators for the 1940 Olympic games. It was decided by Finnish Olympic authorities.

Calgary now owns land for a new \$250,000 airport. Payment of \$31,726 for the property, 640 acres of farm land just outside the north city limits, has been made, civic authorities announced.

Blind and deaf since birth, Winthrop Chapman, 23, has sailed for South Africa as an apostle of a system of lip-reading by touch. He is a son of a Redfield, South Dakota, doctor.

The small red boxes which the Bournemouth corporation placed in all their buses last year to receive fares which conductors omitted to collect yielded almost \$940 when they were opened.

Premier Edouard Deladier, in a press interview, declared there was no cause for concern in the present financial situation and set at rest rumors that French finances were in a critical state.

Of the 45 countries supplying honey to the British market in 1937, Canada again held first place, with slightly more than 22 per cent. of the total imports which amounted to 88,722 cwts. Of this amount Canada supplied 19,984 cwts.

An 11-ton white marble Buddha, gift of China to Great Britain, has created a housing problem in the British Museum which officials say will not be solved for months by finding a suitable position. It dates from 685 A.D.

The French ministry of posts has issued a special foreign postage stamp in honoring the 300th anniversary of Dom Pierre Perignon, the Benedictine monk who invented and developed the process of making champagne.

Clever Young Violinist

Ten-year-old Winnipeg Girl Awarded \$5,000 Scholarship

Donna Greco, 10-year-old Winnipeg violinist, has been awarded a \$5,000 scholarship at the American Conservatory of Music.

The young girl left recently for Chicago, but before leaving, a friend presented her with a \$1,000 violin. She is a pupil of George Bornoff, Winnipeg.

Of Ukrainian descent, Donna is the daughter of Mr. and Mrs. George H. Greco. The father is an engineer in the good roads department of the Manitoba Government.

She will study under Herbert Butler, of the American Conservatory, Chicago.

A Thriving Industry

Canada Produces Millions Of Leather Gloves Every Year

There is a good demand for leather gloves in Holland and Canada supplies to that country have been increasing, particularly gloves for cyclists, motorists and workmen. Canada produces millions of leather gloves every year and the hides used in producing the leather come from Canadian farms. No fewer than 7,223,676 pairs of leather gloves were produced in the Dominion in 1936, cowhide being used for 2,505,612 pairs, sheepskin for 1,971,072 pairs and muskrat for 932,208 pairs, with a total value of \$4,024,590.

Task For The Courts

Belgian Woman's Will Necessitates Going Back Over 300 Years

Bequeathing her money to relatives to the twelfth generation, a Belgian woman has given the courts in Termonde, Belgium, a task of dividing millions of francs among more than 4,000 people. A professional genealogist has made a family tree 450 feet long and going back to 1600. Among the heirs are a cabinet minister and two professors.

Letter Boxes On Buses

The experiment of fixing letter boxes on buses playing on one route in Bombay having proved a success, boxes are to be provided on a second route. It has been found that letters posted in these boxes reach the G.P.O. quicker and a later hour of posting is afforded. The letters are cleared at a stop near the G.P.O.

In Palestine, families rent space in bakeshop ovens by the year and bake the family bread in exactly the same spot each time. They feel that any variance in position will affect the loaf.

Plans Being Made

For Canadian Representation At Seventh World Poultry Congress

Indications are that Canada will be well represented at the forthcoming Seventh World Poultry Congress with a number of provincial or sectional exhibits and commercial and live bird exhibits. The congress will meet at Cleveland, Ohio, from July 27 to August 7, 1939. The members of Canadian executive of the Congress in their meeting at the Central Experimental Farm, Ottawa, have been busy arranging pre-congress tours for European delegates, Canadian tours to the Congress, and matters pertaining to the exhibits and other details.

Canada has been represented at all the previous World Poultry Congresses except the first one which was held at the Hague, Holland, in 1921. The second Congress assembled at Barcelona, Spain, in 1924; the third in Ottawa, 1927; the fourth in London, England, 1930; the fifth in Rome, Italy, 1933, and the sixth at Leipzig, Germany, 1936.

Still Looking For Ruler

Five Signs By Which Tibetans Will Know Dalai Lama

Lieut. P. Burder of the Leicestershire regiment stationed in India has returned to Darjeeling after a history-making hike into Tibet and back. He took a month to complete the journey of 500 miles and his boots were worn out when he arrived back.

Everywhere in Tibet Lieutenant Burder found the friendliest welcome, and a country-wide concern for the new Dalai or Tashi Lama. They eagerly await the signs of Dalai Lama's reincarnation. There are five signs, they told him. Folds of flesh on the shoulders (being vestiges of a second pair of arms); large ears; marks as of a conch shell on the hands; tiger marks (stripes) on legs; and eyes with brows that are long and curl upward. The last Dalai Lama had the first three signs. It is not apparently necessary that all five signs should be present.

SLIM FLATTERY EASILY MADE
By Anne Adams

SO RIGHT for every matron—whether or not she has to reckon with over-emphasized curves! And Pattern 4863 is a perfect example of the new trend in shirtwaist dresses. This season's tailored frocks have a softer, dressmaker's effect, shown in this design with its smoothly edging yokes, neat little puffed sleeves and soft gathers at centre front and waist. Don't you like that neat skirt with a centre seam and single inverted pleat? Saucy buttons and pockets add charm too! This frock is so easy and inexpensive to make up that you're almost sure to want several in a variety of fabrics. Consider checked cottons and washable synthetics... for now, and autumn too! Sewing Instructor included.

Pattern 4863 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 3½ yards 36 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

JIM HOGAN, JASPER, ALTA., WINS JUNIOR GOLF CROWN

Young Canadians have now a stronger incentive to take their golf seriously for the handsome Buckingham Cup donated by Charles H. Slater to the Royal Canadian Golf Association is one year old would be proud to hold. The first winner is shown above receiving the trophy from Mr. Slater. He is 19-year-old Jim Hogan, sharpshooter from Jasper, Alta., who carded 157 over the London Hunt and Golf Club course to lift the Canadian Junior crown this year.

Hobby Is A Pleasure

Florida Bachelor Throws Home Open To Many Guests

Joseph F. Miyares, lawyer and self-styled "old bachelor," of Tampa, Fla., has been host to more than 200,000 guests during the last 10 years at his home, Villa del Rio, and most of his visitors have been children of high school age.

The Tampa attorney said "It's simply a hobby and the pleasure is all mine," as he explained that reputable organizations, high school fraternities and class parties were welcome to use his home at training time for "good, clean, wholesome fun."

An average of 300 guests a week during the past 10 years have taken advantage of Miyares' "hobby," danced at his home, used his 50-foot swimming pool and roamed the two acres of gardens which surround his home.

The parties given at his home always are well chaperoned, Miyares said, "but on some counts they must do as I say."

Railroads Of Tomorrow

Will Have Freight Trains Travelling Faster Than To-Day's Express

According to Pullman Advertisement the tomorrow of railroading will open up a new world. For not only will high speed, high-powered, multi-toned, streamlined trains be cutting through time on every line, but the merchandise of the world will also be carried at a speed far greater than the ordinary passenger train is travelling to-day. For your freight trains, too, will be light weight, modern carriers, travelling with the speed of the wind.

Taking It Easy

A motorist drove to the centre of the mile-long Chemong floating bridge near Peterborough, Ont., recently, parked his car and fished while getting from his seat. He caught a bass, dragged it in and drove away.

During the first eight months of last year, 3,184,000 foreign automobiles entered the Dominion of Canada.

Ohio's first execution for a capital crime took place in 1897.

This new International Harvester combine—specially built for six-foot swath and to be towed by tractor was demonstrated at the factory in Hamilton, Ontario, the last week of July. A field of wheat was cut and threshed, flour made and bread and buns baked for a banquet the same day. We are told this size combine is especially valuable on 160-acre farms.

SUNDAY SCHOOL LESSON

AUGUST 21

HANNAH: GODLY MOTHERHOOD

Golden text: Her children rise up and call her blessed. Proverbs 31:28. Lesson: I. Samuel 1:1-2:10. Devotional reading: Psalm 128.

Explanations And Comments

Hannah's Prayer and Vow. I. Samuel 1:9-11. Hannah and her husband Elkanah went from their home in Ramah every year to the sanctuary at Shiloh to worship and offer sacrifices at the great religious feasts. At one of the feasts, probably "The Feast of Ingathering" or "Feast of Tabernacles" which was held after the grape and olive harvests, Hannah prayed eagerly for a son.

Eli's Wrong Suspicion and His Blessing. I. Samuel 1:12-18. Eli, the priest had been sitting in the doorway of the temple all this time, and, noticing how Hannah's lips moved, though she uttered no words, he jumped to the conclusion that she was drunk.

Roughly Eli spoke to her. "How long wilt thou be drunken? Put away thy wine from thee!" he commanded. Had his words been spoken to his own dissolute sons they had been fitting. "No, my lord, I am heavy-hearted, not drunk, and I have been pouring out my soul before Jehovah. Do not take me to be a wicked woman," was Hannah's reply.

Hannah's Prayer Answered. I. Samuel 1:19, 20. Hannah returned to her home in Ramah. When she was made happy by the birth of a son, she named him Samuel, saying, "Because I have asked him of the Lord."

Hannah Gives Her Only Son To The Service of Jehovah. I. Samuel 1:24-28. When Hannah weaned her boy he was probably three years old. Making herself known to Eli the priest by recalling the time when he had seen her praying in the sanctuary, she presented the boy for whom she had prayed.

First Polar Air Mail

Carried From King's Bay In 1926 By Commander Byrd

Until now "Santa to study stamps and covers you cannot realize that there have been many Arctic mails. In 1926 Commander Byrd carried a mail of 98 letters from King's Bay to the pole and back in 14 days, and this was the first actual polar air mail. Two days after the flight, the Italian airship Norge crossed the pole and finally reached Alaska. Although it was announced that no mail would not be carried on this trip, it was discovered that about 175 covers had been carried in secret by the Italian crew. To-day, of course, the covers are worth a good deal of money.

The dirigible Italia carried official mail to the pole on May 24, 1928, but was wrecked on the return trip, and the great explorer, Amundsen, lost his life in going to the rescue of the crew. Only 29 covers were salvaged when the dirigible was finally located and the crew taken to Rome.

Sweden prepared air mail for the flight by Swedish airmen over the pole in 1928, but the flight had to be abandoned when Greenland was reached, and the letters were ultimately taken by steamer to New York.

At least two German airships have carried mail over the North Pole. The first flight was in July 1931, and there was another survey a month later.

His Scheme Worked

Man Used New Idea To Get Roast For Nothing

A new stunt for securing a roast has been discovered in Norwich, Ont. Recently, "The Son of Sam," a young Aymen, opened a butcher shop in town. Towards the week-end an apparent customer walked into the shop and explained that he had just returned from a trip to California and was consequently short of cash, but that he had several five-pound balls of honey in the car which he would be glad to trade for equal value in meat. For the honey he wanted 10 a pound. Mr. Wright agreed that a trade could be made and cut off a nice piece of meat which, when weighed, came to \$1. The new found friend would just take it to the car and return immediately with two pairs of honey. He failed to return.

His Funny Story

The elevator was not working, so the three men had to walk upstairs to the 50th floor. One of them suggested that they should tell funny stories so they would not notice the distance.

They had reached the 35th floor when it was the third man's turn. "The story I have to tell will break your heart," he said.

"Never mind about that, tell us," said the others.

They went on arguing, until at last he told them:

"I have left the key downstairs."

The night hawk makes the longest all-over land flight of all birds. It migrates from the Yukon country to the Argentine.

All Have Pet Charities

Richest Women In Britain Spend Comparatively Little On Clothes

The question of how British millionairesses spend their money arose recently following a statement that "of the fifty wealthiest citizens of Great Britain more than half are women."

It was clearly a matter for a woman to investigate and a reporter of that sex did so for the London Daily Express and made this report:

"Most of Britain's wealthiest women inherited their fortunes from men who made the money, then left it to their widows and daughters to spend."

"I checked up on their money and found that they do not spend it all on clothes. They care little about fashion—they cultivate homeliness in dress as a disguise. They buy second-hand woollen jumpers and spend their money on homes, yachts, homes for forlorn animals and social crusades. They are not particularly social."

"Two exceptions are Lady Louis Mountbatten and Mrs. Cunningham-Bell—joint heiresses to the fortune left by their grandfather, Sir Ernest Cassel."

"They dress well—usually some modest little thing in black, with a diamond clip or a link of pearls, which on any other woman would be a good imitation."

"They do the full social round. Lord and Lady Louis Mountbatten live in London's only penthouse—on the top of Brook House, Park Lane. It is three-storied, has seven bathrooms, and the rent is \$420,000 a year."

"Some of Britain's wealthy women take passionately to some cause, spend their money crusading for it. Nearly all of them have their pet charities and give thousands of pounds a year to homes and hospitals they fancy."

"Few women have ever made a million from their own work. Gracie Fields, at \$500,000 (\$250,000 a picture, looks like doing it."

Varied Sources Of Revenue

Federal Authority Best Position To Collect Taxes

The Windsor Star says it does make a difference which governing body collects the taxes and pays for relief. Obviously, the Federal authority is in a better and easier position to collect than any other. Its sources of revenue are so varied. It has the income tax, the sales tax, the excise taxes. It is in a position to impose levies that are so widely spread as to be harmless for practically every one, at the same time producing, in the aggregate, tremendous sums of money.

As an instance, consider the federal tax on matches. No one is hurt by it, yet it raises a huge sum every year. A three cent stamp instead of a two to post a letter certainly does the poorest man no harm, yet think of what that extra cent means to the postal department in a twelve-month.

So it goes with the sales tax, customs duties and so on.

The municipality, on the other hand, has only one major source of revenue. It collects its money from real estate holdings, and when it imposes too high an assessment and too high a mill rate, the situation becomes serious in the extreme. High municipal taxes, as Sir Thomas White contends, "kill" home-owning and stifle the building industry and so long as the latter is moribund there will be unemployment and underemployment, high relief costs and high civic taxation—again—the vicious circle.

A London, Ont., magistrate has ruled that a tomato is a vegetable. But not always. Sometimes a tomato is a missile.

It would take 40 days and nights to hatch an ostrich egg by artificial incubation.

POOR MAN'S GOLD

COURTNEY RYLEY COOPER

COPYRIGHT-COURTNEY RYLEY COOPER • W.N.U. SERVICE

CHAPTER II.—Continued

The day passed; jammed in the crowds at the various hardware stores, Jack bought gold pans, picks, hammer, saw and nails, and a dozen other forms of supplies. Night was broken by the barking of soft-muzzled Prince Rupert dogs, being led to the station—many of them to their ultimate slaughter. Trucks whined up and down the abrupt hill; slow-moving horses and trucking drays furnished an obligato to the rumble of motors. A new country, in its very phase, good, bad, upright, low, was forming for life in a far-away, unknown land. He and Joe had created it; now Jack Hammond, as he tried to sleep, felt for the first time a true responsibility for it. Perhaps that was why Around the World Annie snapped her greeting so crustily the next morning.

"Well, Prospector; sure because you ain't got the whole North to yourself!"

Jack halted in his progress through the jammed waiting room of the railroad station. The tri-weekly train was just backing in from the coach yards, with extra chair and baggage cars. Hammond waved to the woman, and with a laugh, edged toward her. It was not an easy journey; his pack sack, topped by an eiderdown sleeping bag, bumped and swayed awkwardly with contact against the milling throng. Every one carried pack sacks, one arm carelessly under a shoulder strap; even Around the World Annie had one.

"What was that remark?" Hammond asked, when he reached her.

"What's been eatin' you?" asked Annie. "You look like somebody's stepped on your chin."

"Just speaking his shoulders. The man spread," he said. Again he looked out over the mob; people crammed in tight groups, or milling excitedly, or merely sitting, like so many homeless souls, on piles of duff. "Look at 'em—all of 'em going to make a million."

"Well, if they think so, what's the difference?" asked Annie. "They'll be happy until they find out it ain't so."

Late that afternoon, Jack Hammond got tired of being jammed against the knob of a vestibule door. The cars had become cold; pipes clanked only faintly with the application of steam. The train was high on the pass over the Coastal range; snow had appeared, at first only a wet sprinkling on the rain-glazed side hills, gradually to become more stable. Now the whole was one of filigreed silver; spruce and pine and Douglas fir all shielded with filmy white.

He moved forward through the train, taking exercise in merely forcing his way through the crowds which jammed the aisles. At last he found and prepared to turn back, only halting to see that Around the World Annie sat in a seat toward the front of the car, her head bobbing energetically as she talked to someone beside her. It was a young woman—Jack noticed little more. Finally, around the World Annie straightened, rose and moved away. Someone else dropped quickly into the seat. Hammond moved into the next coach, found a resting place and stayed there.

Night came, with frost-caked windows and the whine of wind. Snow was now heaped deep beside the right of way. The massed humanity of the train became more and more dormant, suddenly to sweep from its torpidity into excited activity.

They were at Fourcross.

From outside came almost carnival-like sounds. Dogs barked. Children shouted. A raucous voice declared itself above the other noises:

"A-right, folks. Get a good night's sleep. Warm bed and a hot tent for the night, one dollar."

"Where are those beds?" asked Hammond, as he dropped from the train.

"Right over there—" the spier pointed to a line of men moving from the baggage car toward the dull, kerseene glow of a row of tents which spotted the darkness some hundred yards away through the snow. "Right over there, Partner! Have 'em set up in no time. Good warm bed, folks. Only a dollar!"

"Save me one," Hammond commanded and turned to raise his pack sack. He halted, hand extended. In the tangle of activity, he saw Around the World Annie gesticulating with some fervor as she again talked to her companion of the afternoon. She was not recognizable in the shadows; nevertheless, there was something about her which held the man's attention. She stood at one side, ankle deep in snow, her coat pulled tight about her slight form—lack of bulk in her clothing made her seem almost frail beside the thickly clothed, wool-washed persons about her. Annie waved a hand.

"Here," she called to one of her newly outfitted brood. "Bring me that pack sack!"

The girl lifted her pack sack and with lolling steps, came forward. Around the World Annie bent resolutely, failed, loosened her wrist with a pawing motion of her hands, tried again and made it. She jerked loose the straps.

"Here," she said. "Take these woovies. And this shirt."

The girl bent with outstretched, eager arms to receive them. Her face came into the meager spread of light from the train windows. Jack Hammond started. He knew her now—the stairway leading to his attorney's office, this girl coming unsteadily downward, her hand clutched at her throat, her brown eyes staring—

"Thank you," said the girl in a muffled voice. She started to move away. Around the World Annie whacked her on the back.

"And don't be a sap!" she cautioned.

"Thank you," came again. Hammond watched her as she went on, huddled over the burden of good fortune which she held tight to her.

"Who's that girl?" he asked as Annie, somewhat belligerent that he had sighted her, generally swept past him. The woman turned.

"Darned if I know," she answered. Then dismissing him, she turned.

"Come on," she called to her waiting brood. "Let's find out where the Ritz hotel is at around this dump."

CHAPTER III.

Jack Hammond did not see the girl again for nearly a week. That was not unusual. Fourcross rapidly had become a madhouse of endeavor and of waiting. McKenzie Joe was the only person who had gone away, after the note for Hammond, saying that he had changed his mind and stocked up with a four months' supply of food. Then Sergeant Hubert Terry of the Royal Canadian Mounted Police had arrived, holding everyone until a large group could follow Hammond's lead into the Stikine.

"After all," he had said. "You stirred up all this turmoil. It's up to you to see that these people get where they want to go."

Now, assisting the sergeant, Hammond was on the rounds of a final check-up. The trip to the Stikine was to start in the morning. Fur-trimmed parka hoods drawn close about their faces, against the below zero weather, they slipped and scrambled along one of the many trails which led through a maze of shacks and tents. Afternoon was blending into dusk.

"Where to?" asked Hammond.

"I thought I'd drop by and see Around the World Annie."

"Didn't you say you'd checked up on her?"

The sergeant laughed. He was a pleasant-featured man with an air of weathered amiability.

"Yes, I guess I've got to let her go in. What's to prevent it? She's not going to stop on Canadian soil—she knows perfectly well that the Big Moose takes a long bend nearby. Sapphire lake and extends almost to the Alaskan border. Once across that and she can set up any kind of an establishment she wants. The United States authorities aren't going to send men over a needless mountain range just to police a few miles of territory. She's in the clear on that; I want to see her about another matter."

"Mind if we stop by the post office first?"

The sergeant, his dark eyes twinkling in their frame of wolf fur, glanced at the letter in Hammond's hand.

"Wondered what kept you so long," he mused. "Then, 'The daily news, eh?'"

The sergeant stamped his moccasined feet while Hammond mailed his letter, and brushed a mittened hand across his mustache, white with frost. They began to move. Suddenly the sergeant halted before an ice-fringed tent and called "Annie!"

the Alaskan border. Once across that and she can set up any kind of an establishment she wants. The United States authorities aren't going to send men over a needless mountain range just to police a few miles of territory. She's in the clear on that; I want to see her about another matter."

"Mind if we stop by the post office first?"

"Wondered what kept you so long," he mused. "Then, 'The daily news, eh?'"

The sergeant stamped his moccasined feet while Hammond mailed his letter, and brushed a mittened hand across his mustache, white with frost. They began to move. Suddenly the sergeant halted before an ice-fringed tent and called "Annie!"

The Sergeant Halted Before One Ice-Fringed Tent.

Around the World Annie glanced out, invited them in and shouted a command:

"Hey, some of you girls! Unsprawl yourselves and give these gentlemen sitting room on one of these cots."

"Don't trouble yourselves," said the sergeant. "Can't stay long." Nevertheless, the girls obeyed, by a casual sort of shifting process which left one not unoccupied. Sergeant Terry slipped back the hood of his parka. Hammond went to the tin stove, and stood with his back to it.

(To Be Continued)

Pacific Coast Defence

Has Been Demonstrated By British and Canadian Units

Units of the British and Canadian navies demonstrated off Victoria recently in manoeuvres, gunfire, torpedo attack and aeroplane observation.

Premier Pattullo of British Columbia and most of his cabinet saw from M.S. York how Canada's Pacific might in part be defended upon invasion. Also on board were Mayor Andrew McGavin of Victoria, Commander C. T. Board of Esquimalt naval dockyard, Brigadier J. Stewart, officer commanding military district No. 11, officers of the permanent and non-permanent militia, non-commissioned officers of the land forces and representatives of the Royal Canadian naval reserve from Saskatoon and other prairie points.

The York flag ship, Vice-Admiral Sir Sidney Julius Meyrick, commander-in-chief of the British West Indies squadron, with the vice-admiral on the bridge, left the Esquimalt drydock to take part in the manoeuvres with the Canadian destroyers St. Laurent and Fraser and the minesweeper Armentiers.

Export Of Blueberries

Canada virtually monopolizes the import trade of fresh blueberries into the United States, while Newfoundland controls the frozen shipments. At the same time Canada supplies the United States with a fairly substantial amount of the frozen berries. The bulk of the frozen blueberries goes into pie-making.

Paper money in one-, two- and five-dollar denominations usually becomes worn and ready for retirement after being in circulation from six to nine months.

Some species of bats feed on insects, some on fruit, some catch fish, some are blood-suckers, and some are carnivorous.

In 1874, Australian pearl fishers found an oyster in which there were nine pearls, in the shape of a perfect cross.

Daily use of
Wrigley's Gum
helps you keep fit!
Relieves that stuffy feeling after eating. Cleanses crevices between teeth, too... assures sweet breath. A simple aid to health! Buy some now! Small in cost but big in benefits! Enjoy it after every meal—millions do! C-3

Wanted To Be Blacksmith

But Lord Baldwin Was Three Times British Premier Instead

Lord Baldwin wanted to be a blacksmith when he was a boy. Also when he had been six or seven years in the House of Commons he said to himself: "I am no use to man or God in this place and I am going to get out of it." He never became a blacksmith, but he made a fortune in the iron and steel business; and when he left the House of Commons he had been three times Prime Minister.

When a thousand of his friends and former constituents at Bewdley in Worcestershire recently presented him with some valuable old tapestry and an illuminated address he told them of a blacksmith named Ephraim he knew in his boyhood. "Ephraim was a famous smith," he said, "and I always used to envy him his job. It was a man's job. But as the fates would have it, I was to find another kind of man's job, that took no less patience, dealing with material hardly less malleable."

Was Internationally Known

John G. Sullivan, Civil Engineer, Died Recently In Winnipeg

John G. Sullivan, internationally known civil engineer, died suddenly at his home in Winnipeg. He was 75.

A native of Bushnell's Basin, N.Y., and graduate of Cornell University, he was connected with several railways before entering service of the Canadian Pacific Railway in 1900. In 28 years with that company he served as engineer for the western division and then for all Canada and was chief consulting engineer.

From 1905 to 1907 he acted as assistant chief engineer in construction of the Panama canal. Another engineering feat which brought him international recognition was the five-mile Connaught tunnel in the Canadian Rockies. He retired three years ago.

A String Of Names

Englishman Gave Daughter One For Every Letter In Alphabet

The Manchester Guardian says a suggestion in a German official journal that "given names" be restricted to two would be widely "dismembered" by the glimmers of the city.

"He is down in the mouth about having to stay in bed and wants to be up and around," the nurse added. Miss Balcourt whose ability to speak the Cree language, has been a great help in her work, said proudly of her patients at Fort Vermilion are Indians.

All In The Family

A "family style" hold-up cost filling station operator B. H. Weston of Alton, Ill., \$50. After Weston put 14 gallons of gas into a car driven by "a pretty woman," a man alighted, drew a gun and took the money. A 13-year-old boy yanked the telephone from the wall.

The problem facing modern man remains the same: how to support his wife, his children and his government.

Plans for a canal at Panama were made as early as 1513 by Cortez.

"KING OF PAIN"
LINIMENT

The Paper Industry

One Of The Largest In The World Started In China

In the year 75 A.D. a man sat at the foot of a tree and watched a wasp building its nest. A thought was germinated, and out of it developed the paper industry—one of the largest industries in the world today. The man was Tsai Lun, the inventor of paper. He made his first sheets of paper from shrouded pulp obtained from the bark of the mulberry tree, and later progressed to making paper from old fishing nets and rags.

For 500 years the Chinese were the sole makers of paper, and they realized the immense importance of their invention, keeping the art a secret for nearly seven centuries.

In the middle of the eighth century, when the Chinese invaded Turkestan, the Arabs captured a number of professional papermakers, and forced them to disclose the art in order to avoid slavery. Mills were established, and Samarkand became the centre of the world's paper industry. The Arabs took the art with them to Europe, but it was long before it found its way to the various countries. A large number of mills were eventually established in Italy in the fourteenth century, and this paved the way for, and gave impetus to, the invention of printing.

Today China has to import her paper from abroad.—China Digest.

Producing A Newspaper

Very Few People Have Any Idea Of Expense Involved

Commenting on the decision to discontinue issue of the Toledo News-Bee, on account of "greatly increased production costs due to mounting labor costs and rising newsprint prices," the Detroit Free Press says: "Costs of production cannot be forced above a certain point without making it impossible for a newspaper to live on its revenue from circulation and advertising—and when that happens, a newspaper is forced either to merge with some other paper or go out of business."

The man in the street, who pays three cents for a newspaper that gives him the news of the entire world while it is still hot, seldom realizes how many thousands of dollars a day it costs to collect that news, to edit it, to put it into type, to run off the presses, to distribute it on the streets and in the homes of tens of thousands of subscribers."

Are Pretty Good Patients

Nurse At Far North Hospital Speaks Well Of Indians

Jenny Balcourt, nurse at the Fort Vermilion hospital, 300 miles northwest of Edmonton, thinks northern Indians are "pretty good" patients, although their taciturn attitude often makes diagnosis of their ailments difficult.

"Besides, you can't tell when they are pain," Miss Balcourt said.

Nurse Balcourt flew with three patients from Fort Vermilion to Edmonton. One of her charges, Peter Beuchmans, 28, making his first trip to the outside world, was literally "dismembered" by the glimmers of the city.

"He is down in the mouth about having to stay in bed and wants to be up and around," the nurse added. Miss Balcourt whose ability to speak the Cree language, has been a great help in her work, said proudly of her patients at Fort Vermilion are Indians.

Woman Band Band

Composer Started Very Successful Career Quits By Accident

It is still unusual in England to see a woman conducting an open-air orchestra. But Canadian visitors to London will have the opportunity this summer. Miss Avril Coleridge-Taylor, who is the first woman to conduct a band in Hyde Park, will be bused. Probably Miss Coleridge-Taylor is the first woman in England to tackle such heavy jobs as the conducting of municipal orchestras or military bands. She started off on this career by accident. She went to a seaside resort to supervise the rehearsal of one of her compositions, looked on for a moment and was convinced so well the conductor invited her down to take his place on the day of the concert.

Many Countries Belong

The International Bureau for the Protection of Industrial Property is a kind of "League of Nations," which countries having patent systems join and co-operate internationally to protect the discoveries of their nationals. At present some 52 countries and territories, including the United States belong to the union.

Beet and cane sugar are alike chemically.

BEE HIVE Syrup
Is the ideal sweetener on your morning cereal because it is easier to digest.

A Worth-While Address

Given By Lord Tweedsmuir At Edinburgh University Convocation

A new Chancellor was installed at Edinburgh University a few weeks ago. His address to convocation was one which any Scot would be proud to hear, any Scot proud to make. (Scots are adepts in the arts of bearing and making addresses). This one was now grave, now witty—as when it praised the Cambridge toast, "God bless the higher mathematics and may they never be of the slightest use to anybody!"—but always sound in the depth and beauty of its phrases:

"I hear to-day from many quarters foolish jeremiads about the younger generation; jeremiads which are not deep calling to deep, but shallow moaning to shallow. We are told that they lack the enterprise, the stamina and the fortitude of their fathers. That I believe to be wholly untrue. I have always regarded my own undergraduate generation as vigorous and enterprising, but it seems to me that the present generation has a physical audacity which would have left us gasping."

The new Chancellor is known to all lovers of good tales, well told in robust prose, as John Buchan. He is sometimes known as Lord Tweedsmuir, Governor-General of Canada.—New York Sun.

More Than Brains Needed

German University Students Must Also Qualify As Athletes

It is announced from Berlin that students taking examinations for all German universities must:

Be able to run two miles in 13 minutes; jump 13 feet, six inches; throw a 16½ weight eight yards; and swim 54 yards, breaststroke, in 60 seconds.

Imagine a Goethe up against a physical test of that description, or a Handel or a Beethoven...

On reduction ad absurdum, fancy imposing those "matriculation" conditions upon two of their most prominent authors, the ponderous Goethe or the crippled Goebels!

But that, of course, is the absurd essence of the case; not what the readers could or should do, but what the rank-and-file must do.—Halifax Herald.

Its First Wedding

Although more than 100 years old, Sutherland's River, a small district near New Glasgow, Nova Scotia, had its first wedding in July when Christine Jean Powell and Raymond MacDonald of Trenton were married by Rev. Alexander Mills of Thornburn.

A meteorite which fell near Santa Cruz in Mexico, shook the earth so much that passengers in a train for Mexico City thought that it was an attempt by rebels to blow up the railway line.

The average annual temperature of Florida is 70.8 degrees.

C. M. & S. Co. Employees to Get Stock

Consolidated Mining & Smelting Co. of Canada, Limited, will distribute 1,988 shares of company stock, with a total market value of \$120,000, among employees at Trail, Rossland and Kimberley next week, it was announced today.

Of the total, 364 employees will receive five shares each and 168 will get one share each.

Last year a new ruling was laid down by the company, that one share

will be given each employee every two years of service.

Under the ruling, men getting one share this year have worked 12 years for the company, obtaining their five shares before the ruling came into effect.

Those receiving five shares this year have been with the company for the past three years and will have to work another nine years before they are eligible for a share every two years, it was said by officials. New employees will get one share every two years.

The present market value of a share of about \$60.

Local News

Mrs. John McDonald is visiting her mother at Duchesne, Alta.

Miss Lottie Nicholas is spending two weeks at the coast.

Born—To Mr. and Mrs. Roy Foster, (nee Betty Thomas) on Saturday, Aug. 13, a daughter.
